DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,3-5 of U.S. Patent No. 6,623,489. Although the conflicting claims are not identical, they are not patentably distinct from each other because they recite the same subject matters as following: an emboli extraction catheter and vascular filter for insertion into a lumen of a vessel comprising: a tubular member has a gripping means provided at front end of the tubular member, where the gripping means including a plurality of gripping elements, where a tube is axially movable inside of the tubular member between one position in which it acts on the gripping elements so as to move the gripping elements to the closed position. As to claims 2-4 are not patentably distinct from each other because they are essentially the same as those in the cited patent.

Specification

3. The abstract of the disclosure is objected to because it contains legal phraseology such as "means". Correction is required. See MPEP § 608.01(b). Furthermore, the abstract is too long.

Art Unit: 3734

It is important that the abstract is in narrative form and generally limited to a single paragraph (within the range of 50 words). Appropriate correction is required.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
